

**Air**  
**Active**  
for healthy skin

Always in good hands:  
Safe, soft and easy-fit MoliCare® Comfort.

She wants to feel perfectly safe and confident.

# Safe and sound all around: Incontinence care with MoliCare® Comfort.

Feeling **safe, dry and comfortable** – that's what incontinence care is all about. The new MoliCare® Comfort combines **high leakage protection** with **a new level of skin friendliness** and an easy fit.

## Maximum wetness protection

The **three-layer absorbent core** quickly guides the fluid into the center, stores it there and **locks odours safely**. Due to its **high capacity**, the absorbent core ensures reliable leakage protection especially **at the back**. Fluid-repellent inner cuffs with large pockets at the front and back provides additional **safety and protection**.

### Easy fit and flexibility in every situation

The well proven **anatomical shape** ensures **easy application and snug fit**. Elastic tapes also facilitate the fitting and add reassuring flexibility – **even when moving**.

### Superior breathability for healthy skin climate

The **highly air-permeable** non-woven material ensures a **pleasant skin climate** in the hip area and helps to prevent skin irritations. What's more, **the softness of this "Air-Active"-material** simply **feels good** to the skin.

### Your benefits

- High leakage protection
- Best possible breathability and skin- friendliness
- Easy to apply
- Comfortable and safe to wear

— Both ask for more skin friendliness and breathability.

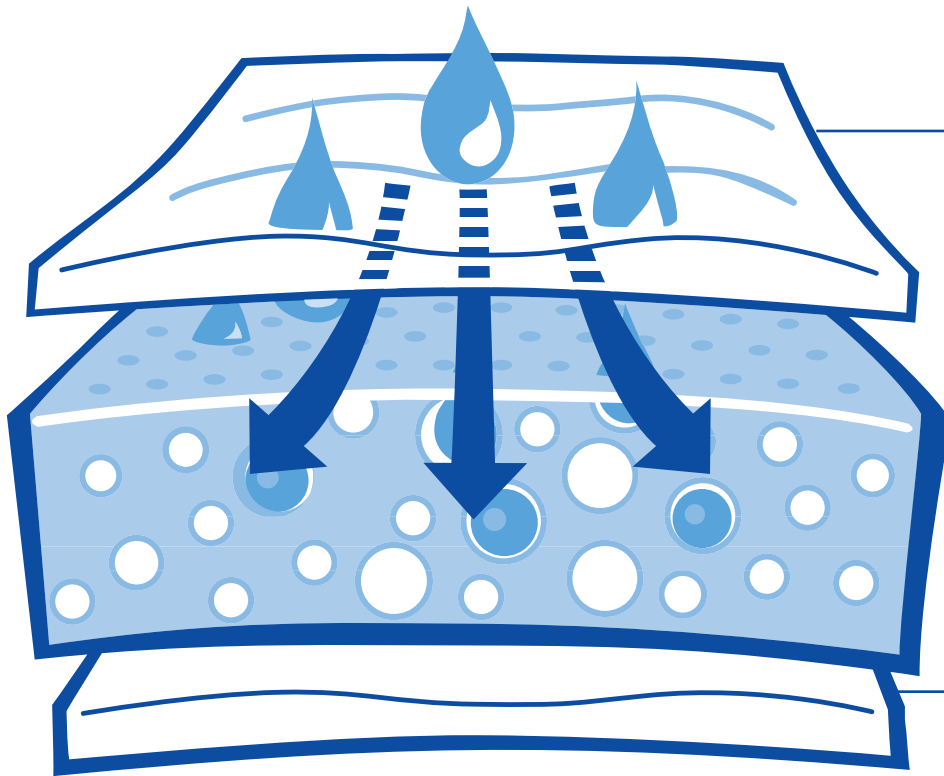

For her, easy application is also important.

**New MoliCare® Comfort:**

Meeting the needs of incontinence care with a professional solution that is comfortable too.

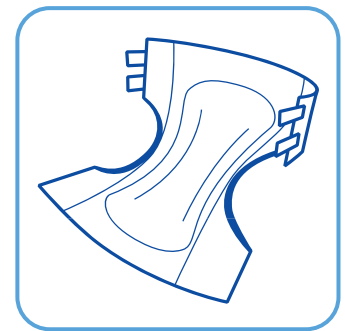

**Air  
Active**

Protection you can feel comfortable with:  
The HARTMANN three-layer absorbent core for maximum

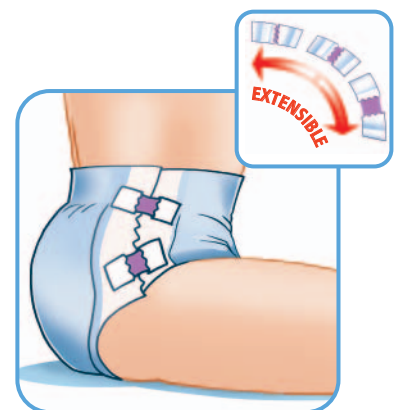

### Easy application...

Wearing comfort starts with the application. That's why MoliCare® Comfort comes in **anatomical shape** for easy application and perfect fitting results.

### ...and better fitting

Thanks to its elastic adhesive tapes MoliCare® Comfort improves the fitting for more mobility without constriction and risk of leakage.

# um dryness.

## **Making dryness a welcome reality: the top layer**

Special fibres of **natural cellulose** pass fluid rapidly through the top layer into the absorbent center – leaving nothing but a **pure feeling of dryness** on the skin.

## **Locking fluid perfectly: the absorbent center**

The core layer with its super absorbent granules **locks fluid and odour inside** and stores them safely. Fluid is also **effectively retained at the back** where body weight exerts extra pressure.

## **Providing stability and wearing comfort: the bottom layer**

**Soft cellulose material** stabilises the absorbent core giving a comfortable feeling – in every situation.

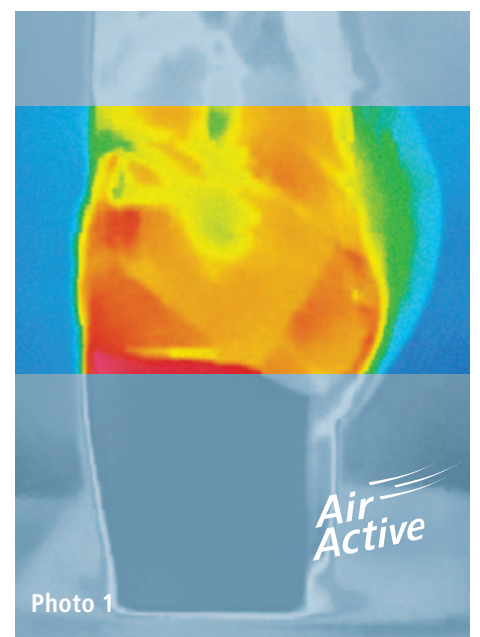

Skin can breathe again:  
Soft non-woven material for the hips.

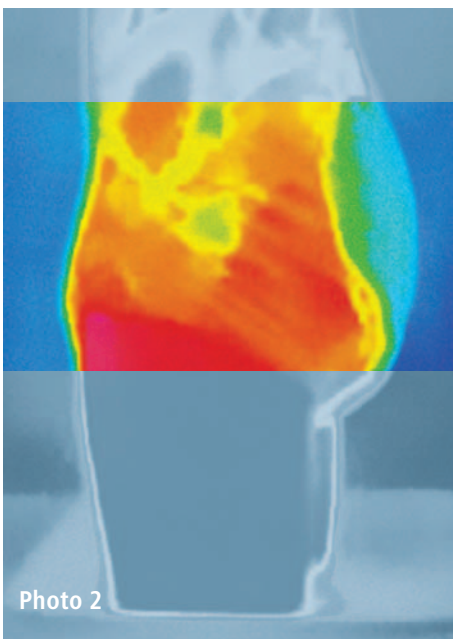

### Improved skin temperature in the hip area.

Infrared camera photos demonstrate the „cooling effect“ of the „Air Active“-material in the hip area. Compared to PE-film (2) the Air Active-material (1) **promotes a cooler skin temperature.**

New MoliCare® Comfort has the soft non-woven „**Air Active**“-material for the hips. Its **superior breathability** provides a perceptible **healthier skin climate** that helps to prevent from skin irritations.
